Reduce Disaster Suffering

David I. Maurstad
FEMA Deputy Associate Administrator for Insurance and Mitigation
senior executive of the National Flood Insurance Program
Equity in Action premiums will more accurately reflect a property’s unique flood risk by considering a broader range of variables.

**Current Rating Methodology**

- FEMA-sourced data

  - Rating Variables
    - Flood Insurance Rate Map Zone
    - Base Flood Elevation
    - Foundation Type
    - Structural Elevation (Special Flood Hazard Area Only)

  - 1% Annual Chance of Flooding (Frequency)

  - Fees and Surcharges

**Risk Rating 2.0 Methodology**

- FEMA-sourced data

  - Additional data sources: Federal government-sourced data, commercially available third-party

  - Cost to Rebuild

    - Rating Variables
      - Distance to Coast/Ocean/River
      - River Class
      - Flood type — Fluvial/Pluvial
      - Ground Elevation
      - First Floor Height
      - Construction Type/Foundation Type

  - Broader Range of Flood Frequencies

  - Fees and Surcharges

*Additional variables are not shown here

Federal Emergency Management Agency
Why Risk Rating 2.0: Equity in Action

**RESPONSIBILITY:** FEMA has the statutory mandate to set actuarially sound rates and clearly communicate risk.

**EQUITY:** Individuals will no longer pay more than their share in flood insurance premiums based on the value of their homes. Roughly 2/3 of policyholders with older pre-FIRM homes will see a premium decrease.

**SUSTAINABILITY:** Risk Rating 2.0 sets the NFIP on a path to become more financially resilient.
What is Not Changing

- Statutory rate caps on annual premium increases
- Availability of premium discounts
- Transfers of policy discounts to new homeowners
- Use of Flood Insurance Rate Maps (FIRMs) for mandatory purchase and Floodplain Management
- Availability of premium discounts for Community Rating System (CRS) participation
Equity in Action – National Rate Analysis

Under the **current rating methodology**, every year at renewal, policyholders on average see premium increases of $8 per month.

- **23%** of current policyholders will see immediate premium decreases.
- An additional **66%** of current policyholders will see, on average, **$0 - $10 per month** increases.
- **7%** of current policyholders under Risk Rating 2.0 will see, on average, **$10 - $20 per month** increases.
- And **4%** of current policyholders under Risk Rating 2.0 will see, on average a **$20 or more per month** increase.

Federal Emergency Management Agency
Risk Rating 2.0 vs. Current Rating System: Rate Changes

- In year one at their next renewal, **82% of single-family homeowners** will see monthly **decreases**, or increases of **$5 or less**, with Risk Rating 2.0 compared to the current rating system.

- In year one at their next renewal, **94% of single-family homeowners** will see monthly **decreases**, or increases of **$10 or less**, with Risk Rating 2.0 compared to the current rating system.

**Under the current rating system,**
policyholders do not receive premium decreases.
Under the current rating system, 45,000 policyholders will see increases of more than $100 a month. The single-family homeowners in this group have an average RCV of $399,643.

Under Risk Rating 2.0, only 3,200 policyholders will see increases of more than $100 a month. The single-family homeowners in this group have an average RCV of $1,064,537.
What can policyholders with steep flood insurance costs today expect under new pricing methodology?

<table>
<thead>
<tr>
<th>Methodology</th>
<th>Single-Family Home Maximum Policy Cost*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Rating Methodology</td>
<td>$45,925</td>
</tr>
<tr>
<td>Risk Rating 2.0</td>
<td>$12,125</td>
</tr>
</tbody>
</table>

Policyholders paying the most under the current methodology will see dramatic decreases when they transition to Risk Rating 2.0.

Equity in Action – Phased Approach

New single-family home policies

New multi-unit home policies

New commercial property policies

Existing single-family home policies

Existing multi-unit home policies

Existing commercial property policies

Oct. 1, 2021*

April 1, 2022

*Also beginning Oct. 1, 2021, existing policyholders eligible for renewal will be able to take advantage of immediate decreases in their premiums.
Equity in Action – Resource Investments

TIME: Research, design, analysis, development, and testing translates to 5+ years of work and thousands of hours.

PEOPLE: The cross-functional team of 20+ NFIP program experts, including 8+ full-time actuaries, collaborated with a diverse network of experts from a wide range of disciplines:

- Academics
- Actuaries
- Building scientists
- Engineers
- Insurance industry experts
- Mappers
- Underwriters
- Mitigation experts

TECHNOLOGY: Cutting-edge technology and best available data used to make a modern-day program:

- Private Sector Rate Setting Methods
- Private Sector Catastrophe Models
- Government Models, Available Data, and Collaborations

Federal Emergency Management Agency
To date, FEMA has conducted over 450 outreach and engagement activities around Risk Rating 2.0: Equity in Action.
Risk Rating 2.0: Equity in Action — Support from Insurance Commissioners

- Florida Insurance Commissioner David Altmaier:
  
  “The goal of Risk Rating 2.0 is to bring rates more in line with what they ought to be. And I think that that could ultimately result in consumers having more options for flood insurance... I think that brings a lot of consumer benefit.”

- Mississippi Insurance Commissioner Mike Chaney:

  “I agree with FEMA's assessment of the update... The NFIP has historically suffered from funding issues and needed a long-term solution to provide flood insurance for years to come. Risk Rating 2.0 ensures protection for flood policyholders going forward.”

- Louisiana Insurance Commissioner Jim Donelon:

  “[Risk Rating] 2.0 will right-size big homes vs. little... In particular, those in smaller properties that have been historically overpriced, and are being right-sized in this proposal... We will not see draconian increases with this reform of the pricing mechanism at FEMA. We can make the program more fiscally sound....”
“Based on FEMA’s nationwide analysis, Risk Rating 2.0 will help ensure NFIP policyholders pay a rate proportionate to their property risk. The new initiative will also help FEMA identify and target mitigation grant dollars to the highest risk properties.”

“Pew fully supports FEMA’s updated approach and concludes that Risk Rating 2.0 will better align rates with risk, create a fairer program, increase transparency and understandability, and encourage additional mitigation from policyholders and communities.”

NAR includes 1.4 million brokers, salespeople, property managers, appraisers, counselors, and others engaged in all aspects of the real estate industry.
“Better preparing the NFIP for the realities of climate change is an important policy task in the coming years. Risk Rating 2.0 is the first critical step.”

Op-ed: A Step Toward Flood Insurance Fairness*

“Better pricing will help taxpayers ... More reform is needed ... But letting FEMA's changes move forward would be a small step toward fairness and solvency.”

*This article was written by WSJ's editorial board.
