QUARTERLY MORTGAGE PERFORMANCE REPORT Q1 2021

QUARTERLY MORTGAGE BANKERS PERFORMANCE REPORT

The Mortgage Bankers Association (MBA) is pleased to present the next report in a quarterly series on the revenues and expenses associated with the origination and servicing of one-to-four-unit residential mortgage loans. This report offers a variety of performance metrics on the mortgage banking industry and is intended as a financial and operational benchmark for independent mortgage companies and subsidiaries of banks, thrifts and non-depository institutions.

In addition to revenue and expense data, the report includes detailed information on production and servicing volume mixes by product type, as well as employee productivity. An overall net income summary and balance sheet profile are also part of the report. Some notes to keep in mind:

- The underlying company data are derived from the Quarterly Mortgage Bankers Financial Reporting WebMB Form (MBFRF), through a joint agreement with MBA, Fannie Mae, Freddie Mac and Ginnie Mae. Independent mortgage companies are required to submit quarterly MBFRF data to the agencies and have the option of releasing their data to MBA for use in aggregate industry statistics.
- MBA produces five MBFRF publications per year: four quarterly reports and one annual summary report. These reports may be purchased as a one-year subscription of all four quarterly publications (the Quarterly Mortgage Bankers Performance Reports), which includes the Annual Mortgage Bankers Performance Report, free of additional charge. Alternatively, the Annual Report may be purchased as a stand-alone product.

- MBA member companies who release MBFRF data to MBA on a quarterly basis are also eligible to receive their individual company benchmarks in the same format as the quarterly reports at no additional charge. This product, called the "Your Firm Analysis" report, is available exclusively to MBA members.
- The reports incorporate both production-only and servicing-only companies, as well as companies in both production and servicing.
- The results (such as cost per loan, servicing revenues in basis points, etc.) are based on simple averages. In other words, companies with more originations or servicing volume are not given more weight in the calculations. All companies in the sample are given the same weight so that the results reflect a typical lender.
- The production results are broken out into peer groups based on originations levels, company type and production channel (retail originations only versus wholesale). This way, retail channel-only companies are able to compare themselves to other retail channel-only companies of similar volume.

MBA follows the general timeline below for the release of the Quarterly Mortgage Bankers Performance Report and Annual Mortgage Bankers Performance Report:

1st Quarter: June | 2nd Quarter: September 3rd Quarter: December | 4th Quarter: April | Annual: June

On behalf of MBA, we wish to thank those mortgage banking companies that released their data to us. Please do not hesitate to contact us at mbaresearch@mba.org or visit mba.org/research for more information.
